

Detention

Storm Capture provides cost-effective solutions for site applications where stormwater needs to be detained and allowed to discharge at a controlled rate. Storm Capture allows maximization of developable land by allowing detention to be placed efficiently and easily under parking lots and roadways with very little cover, as well as in non-traffic areas.

Maintainable

- Designed for maintenance, not replacement
- Optional direct module access
- Open Interior

Structurally Superior

- Vehicular traffic loading design with as little as 6" of earth cover
- No concrete footing required
- Designed for HS-20-44 for full truck load plus impact

Efficient

- Large storage capacity
- Not reliant on stone backfill for storage
- Unique Link Slab™ design reduces concrete

Economical

- Competitive installed and lifetime cost
- Typically backfilled with existing site materials
- Large capacity yields smaller footprint
- Rapid and simple installation
